

R A M I C K

building tomorrows networks today

company profile

The Ramick Group was formed in 1983. As one of the first Specialist Data Cabling/Network Installers, Ramick have a well-established customer base and high level of repeat business.

Quality Assured

The company attained ISO 9002 in 1992. *Ramick* maintains an effective Quality Management System for the Installation, Inspecting and Testing of Computer Cabling. This system consists of a quality manual, procedures, work instructions and complete and accurate records.

Staff Ethos

“To provide the highest level of service to customers on a ‘right first time basis’.”

Ramick has considerable fixed assets, however it's greatest assets are in the staff and the experience they provide.

Ramick has a permanent staff of over 36 people who between them have more than 95 years experience in the data and voice communications industry. Staff are constantly kept abreast of all developments within the industry by structured training programs. Strict industry standard practices are adhered to throughout the installation and commissioning process.

What this means for the customer?

It is the policy of *Ramick* to install and terminate Computer Cabling to the highest standard, at competitive prices and to meet our valued customer expectations. To ensure this we have adapted the attitude of being 'Right First Time' for all installations, inspecting and testing of Cabling installations.

On site the supervisor or Installer is responsible for ensuring on a day to day basis that all cabling is installed, inspected and tested in accordance with works instructions, customer requirements and documented quality system.

To ensure overall and ongoing compliance with these requirements the Supervisor will ensure that Quality System Audits are carried out. These audits are carried out on site.

Within this system a list of approved suppliers are held. Procedures are also held for approval of new suppliers.

Ramick ensures that Inspection and Testing of all Cabling Installations is undertaken by qualified personnel and that it is in accordance with customer requirements and the installation plan.

Sales & Customer Service

Ramick will assess your individual requirements and upon understanding your business communications needs we can supply and install the most effective solution to improve your overall productivity and efficiency.

Ramick have employed industry specialists/Professionals who can assist and advise on potential communication solutions. We feel that for the best results it is essential to organise face-to-face meetings and discussions are organised on site, in order that we can best understand your business and the requirements for total communication solutions.

“Combining pre-sales consultancy with our high levels of technical expertise will ensure that we offer a tailored solution based upon your specific needs”.

We believe in the necessity of all round customer service, and to this end we will form a business relationship with the customer from the pre-sales initial contact, through order and installation right through to after-sales training, maintenance and value added services.
